ABOUT ME

Third-year Computer Engineering student with a strong foundation in full stack development and AI/ML. Proficient in Python, Java, JavaScript, and modern web development frameworks such as React.js and Node.js. Experienced in building both frontend and backend systems, with a strong understanding of software development life cycle (SDLC) and Agile methodologies. Passionate about clean code practices, user-first design, and solving real-world problems through technology. Motivated to contribute to fast-paced, collaborative environments with a focus on continuous learning and innovation.

SKILLS

Programming Languages : Python, Java, JavaScript, TypeScript, PHP

Frontend : React.js, HTML, CSS

Backend : Node.js, Laravel

Databases : MySQL, MongoDB

AI/ML Frameworks : Tensorflow, Pytorch, Scikit-Learn

Libraries : OpenCV, SpaCy, NLP, NumPy, Pandas, Matplotlib, Seaborn

Concepts : OOP, Data Structures & Algorithms, SDLC, Agile

PROJECTS

1) AI ADVERTISEMENT POSTER REVIEWER

An AI-powered tool that analyzes advertisement posters and provides performance insights based on likability, uniqueness, and audience suitability. Helps advertisers optimize their designs through data-driven scores and visual reports.

- Generates detailed scores and insights for ad effectiveness.
- Features a user-friendly web interface for quick ad evaluation.

2) AI HOUSE PRICE PREDICTOR

A machine learning model that predicts house prices using a Random Forest Regressor. preprocesses data, trains on key factors like location and size, and provides real-time price estimates.

- Implemented data cleaning, feature selection, and preprocessing for better accuracy.
- Developed a training script and real-time prediction tool for property valuation.
